Atlantic RM (Available in Std & LV Versions)

The Atlantic RM (Roto-Moulded), just like the composite version, is a linchpin of the North Shore range.

Manufactured in triple layer HDPE (High Density Polyethylene) and manufactured at one of the most cutting-edge moulding facilities in the UK. These latest spec. Atlantic RM's are the best plastic kayak's we've ever produced. They now feature; weight, rigidity and performance, comparable to the composite version.

Design wise, The Atlantic RM, features the same moderately rockered, soft chined and shallow v'd hull, as the composite version.

Atlantic RM is that illusive Jack of all trades that really has mastered them all...

This is a combination that has captured the hearts of paddlers around the world for many years. The design providing that illusive balance between predictability and performance, giving confidence to the novice but inspiring the more experienced. The Atlantic RM could easily be the only Sea Kayak you'll ever need.

Whether you want to explore calm waters, play in costal swells or ride the surf, the

The Perfect Allrounder

Tough Tripple Layer HDPE Construction

Our Best Value Sea Kayak

Specifications	Recommended Paddler Weight*	Kayak Length	Kayak Width	Kayak Weight	Max Internal Deck Height
Atlantic RM	65-115kg 145-255lbs	515cm 16' 11"	55cm 22"	26.75kg 59lbs	30.5cm 12"
Atlantic RM LV	45-95kg 100-210lbs	485cm 15' 11"	55cm 22"	25.5kg 56lbs	28.5cm 11 1/4"

*Recommended Paddler weight is only given as a guide, as it is very dependent on experience, the fit you prefer and the amount of other kit being carried.
