Atlantic Evolution (Available in Std & LV Versions)

This, the latest incarnation of the Atlantic remains the linchpin of the North Shore range, a place it has held for the last three decades. It has maintained this popularity due to the steady evolution of the design, over those years, the latest updates ensure this kayak is still one of the best all-round sea kayaks available.

Like all North Shore composite kayaks, each Atlantic Evolution is handmade in the UK by a team of craftsmen using the finest material available.

One of the most notable things about the Atlantic, is that those trying one for the first time, almost never want to give it back.

With its classic combination of a moderately rockered, soft chined and shallow v'd hull, this is the combination that has captured the hearts of paddlers around the world for over 30 years. The Atlantic providing that illusive balance between predictability and performance, giving more confidence to the novice but inspiring the more experienced to develop further.

Whether you want to explore calm coastal waters, play in ocean swell or ride the surf,

the Atlantic is that illusive Jack of all trades that really has mastered them all...

The Perfect Allrounder

Craftsman Made In The UK

A Design Perfected Over 30 Years

Specifications	Recommended Paddler Weight*	Kayak Length	Kayak Width	Kayak Weight	Max Internal Deck Height
Atlantic Evo	65-115kg 145-255lbs	515cm 16' 11"	55cm 22"	25kg 55lbs	30.5cm 12"
